

## IDEATION PHASE

### *Literature Survey*

|               |  |
|---------------|--|
| Date          | 03 September 2022                        |
| Team ID       | PNT2022TMID04905                         |
| Project Name  | Analytics For Hospitals Health-Care Data |
| Maximum Marks | 4 Marks                                  |

| S.no. | Title   | Author                         | Year of publication | Problem identification   | Techniques used         | Drawbacks  |
|-------|---|--------------------------------|---------------------|--|-------------------------|--|
| 1.    | Big data analytics: Understanding its capabilities and potential benefits for healthcare organizations. | Yinchuan Wang, et.al.,         | February 2016       | Our findings will help healthcare organizations understand the big data analytics capabilities and potential benefits. | Apache.                 | To address this lack, this study examines the historical development, architectural design, and component functionalities of big data analytics. |
| 2.    | Big data analytics solution for intelligent health care management.                                     | Alejandro Bal dominos, et.al., | March 2017          | The users to help able to see understand the valuable information provided by data care, the visual analytics.         | Apache spark, Mongo DB. | Big data can also pose risk and undermine pose doctors.  |
| 3.    | Analysis of healthcare big data.  | Zhihan Lv, et.al.,             | March 2020          | Hospitalization cost, and the insured population all show a trend of increasing year by year.                          | Hadoop                  | the hospitalization costs show a trend of increasing year by year in recent years.   |

|    |  |                              |               |   |  |   |
|----|--|------------------------------|---------------|---|--|---|
| 4. | Healthcare analytics in Era: A survey.   | Mohammad zunnunkhan, et.al., | March 2019    | It helps new data and security models for measuring security & quality of data using health care environment.   | Machine learning   | Data sets can gain unwanted attention from hackers and important information can be leaked to competitors.                      |
| 5. | A Framework for Data Analytics-Based Healthcare Systems.                               | V.Muneeswaran, et.al.,       | February 2021 | Data analytics is becoming a future escalating tool of all industries including medicine, robotics, etc.,   | generic XML  | the term data is unavoidable and certainly, nothing is possible without its usage.  |
| 6. | A survey on Data mining approaches for health care.                                    | Divya Tomer, et.al.,         | October 2013  | Data mining offers novel information regarding health care helpful for making administrative as well as prediction of disease, selection of treatment, health insurance policy. | classification, clustering, association, regression in health domain | Decision regarding selection of merge of split point. Once a decision is made it cannot be undone.                              |
| 7. | A Framework for Pandemic Prediction Using Big Data Analytics.                          | Imran Ahmed, et.al.,         | January 2021  | the novel coronavirus pandemic (COVID-19) outbreak is seriously threatening human health.   | machine learning   | prescriptive analysis applying big data analytics using a novel disease real data set, focusing on different pandemic symptoms. |
| 8. | Big- Data Analytics for IoT-Enabled Smart Healthcare System.                           | Syed Rooh Ullah Jan.         | January 2021  | Security Optimization, Implementing and testing on real world patients.   | Machine learning   | Precision, Interoperability. Real time, Single Drabacks subject, Low accuracy.  |
| 9. | Big Data Analytics in Healthcare Medical Image Processing from Big Data Point of View. | Daniel A, et, al.,           | May 2015      | The user to help able to information provided by healthcare.  | Machine learning   | Delayed enhanced MRI has been used for exact assessment of myocardial infarction scar.  |

|     |   |                         |                |  |                         |   |
|-----|---|-------------------------|----------------|--|-------------------------|---|
| 10. | Influential Usage of Big Data and Artificial Intelligence in Healthcare.          | Sadia Khan, et, al.,    | September 2021 | users of the machines do not have enough knowledge on using the technologies/machines.   | Apache spark, Mongo DB. | have sufficient data and knowledge about machines and technology.   |
| 11. | Big data analytics for healthcare industry: impact, applications, and tools.      | Sunil Kumar             | October 2018   | huge amounts of structured, unstructured, and semi-structured data have been generated by various institutions around the world.   | Hadoop                  | The health industry sector has been confronted by the need to manage the big data being produced by various sources, which are well known for producing high volumes of heterogeneous data. |
| 12. | Current practices in clinical Analytics: A hospital survey.                       | Dana Womack, et, al.,   | June 2012      | The purpose was to better understand current practices, capabilities and challenges related to Clinical data analytics.  | machine learning        | lack of organisational alignment and or strategy for data analysis as a challenge<br>Lack of standardized methods and electronic tools.   |
| 13. | Big Data Analytics Framework for Opinion Mining of Patient Health Care Experience | G. Sabarmati, et, al.,  | March 2020     | Preciously administration might be able to acknowledge the crucial decision-making process where the new investigations would be accounted for different research avenues. | hadoop                  | The huge amount of data derived from this humongous volume of information   |
| 14. | Healthcare Analytics in the Modern era.   | Waseem Afshar.          | July 2021      | designed due to the solution of complex problems such as health disparities.   | Artificial Intelligence | unable to read the following documents for the help in using the documents of power of the public in the world  |
| 15. | Big data analytics for personalized medicine.                                     | Choong Ho lee, et, al., | August 2019    | Multiview data analytics requires advanced machine learning techniques   | machine learning.       | Medical big data analyses are complicated by many technical   |

|     |   |                             |              |   |  |  |
|-----|---|-----------------------------|--------------|---|--|--|
|     |   |                             |              | such as deep learning and cognitive computing.  |  | issues, such as missing values, curse of dimensionality, and bias control.   |
| 16. | A review of secure and privacy - preserving medical data sharing.   | Hao Jinn, Yan Luo, et, al., | May 2019     | The cyber infrastructure boundaries of health care organisations and privacy leakage threats place obstacles on the sharing of medical records.   | block chain, Cryptography, HITECH computerized order entry.    | potential proprietary/data plagiarism issues<br>Higher Risk of files Being shared publicly   |
| 17. | Chronic Diseases and Health Monitoring Big Data: A survey.  | Rongcheng Lin               | April 2018   | It focuses on the full cycles of the big data processing, which includes medical big data pre-processing, big data tools and algorithms, big data visualization, and security issues in big data.   | Machine learning.  | in recent years, there has been much research in medical big data, mainly targeting data collection, data analysis, and visualization.                       |
| 18. | Health Big Data Analytics: A Technology survey  | Jong Wouk Kim               | October 2018 | The system should not only be able to help to the provision of a successful and timely care by recommending a practical diagnosis.  | Machine learning   | For data mining, no single algorithm provides a fit-all solution to health data.   |
| 19. | Roles of Innovation Leadership on Using Big Data Analytics to Establish Resilient Healthcare Supply Chains to Combat the COVID-19 Pandemic. | Suraj it bag, et, al.,      | August 2021  | Our structural equation modelling analysis using the partial least squares (PLS) method revealed that BDA capabilities play a pivotal role in building a responsive HSC and improving innovation.   | machine learning   | we argue that the role of innovative leadership in the COVID-19 pandemic situation is critical as it indirectly affects HSC resilience when BDA is in place. |
| 20. | A systematic review of health care big data.  | Rakesh Raja, et, al.,       | July 2020    | Analysing different perspectives about the concept of big data in healthcare<br>Exploring the origins of healthcare big data<br>Identifying tools and techniques for healthcare big data Analytics. | Machine learning<br>Systematic Literature Review (SLR) Method. | lots of big data is unstructured<br>It can be used for manipulation of customer records  |
